

STOCKSAFE-T® LONGLIFE™ – FOR HORSES

PREFABRICATED FENCING FOR STABLES, YARDS OR FENCING OF STUD STOCK.

Stocksafe-T for horses is a prefabricated wire fence product designed to keep horses safely contained and keep unwanted animals out.

Application

Stocksafe-T for horses is an ideal alternative or complement to traditional post & rail fencing in stables & stallion yards. The close picket spacings reduce the risk of injury from pawing, stepping or walking down the fence, and sharp wire ends that may cut animals, have been concealed.

Specifications

Wire Size	Roll length	Suggested applications
13/122.5/5	30m / 50m*	Horses, dogs, house fence 

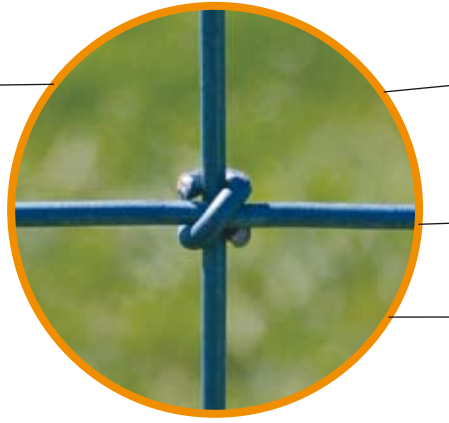

*50m rolls available upon request for large orders. Lead times apply.

Features & benefits

- **Stocksafe-T knot**

- Conceals sharp wire ends that may cut horses if they rub against the fence.
- Creates a rigid picket spacing that provides an effective barrier and improved safety containment.
- Forms a tight bond with the line wires to help keep the fence from sagging & reduce maintenance costs.

- **Tight 5cm x 10cm picket**

- Minimises the potential for injury to a horse from pawing, stepping or walking down a fence.

- **Manufactured from Australian steel**

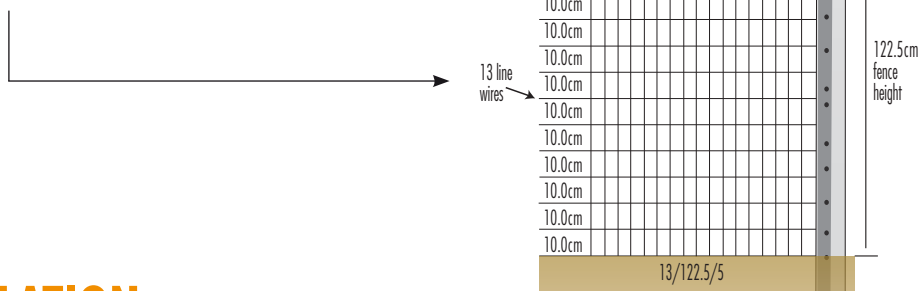

- Provides uniform strength and consistent quality over the length of the fence.

- **Waratah Longlife coating technology**

- Maximum corrosion protection so you replace fences less often.

Explanation of wire size:

$13/122.5/5 = 13$ line wires with spacings as illustrated
122.5cm fence height
5cm picket spacings.

INSTALLATION

1. Install your end assemblies and fence posts.
2. Roll Stocksafe-T along the fence line, ensuring the smaller picket spacings are at the bottom.
3. Tie off each line wire to one end assembly & then evenly attach a Wedgelock® clamp to the wire at the opposite end.
4. Attach Wizard® wire strainer chains at the top & bottom of the strainer post. Hook the Wedgelock clamp to both Wizard wire strainers.
5. Apply even strain using the Wizard levers. Tension to the '2.50mm fabricated fencing' mark on the Tenser Sensor®.
6. Tie off around strainer post, then carefully remove Wizard strainers & the Wedgelock clamp.
7. Secure fence to posts using Star® post clips (for GalStar® posts) or staples (for timber posts).

TOOLS AND ACCESSORIES

These tools & accessories will help with installing Stocksafe-T:

- Gripple® TClip – eliminates the need to tie knots
- Wedgelock clamp – pre-fabricated straining tool
- Wizard strainers – wire straining tool
- Star post clips – to attach wire to GalStar posts.
